# 1. Extract "**r6**" folder into dlc folder
C:\Grand Theft Auto V\update\x64\dlcpacks

# 2. Use OpenIV find those file and extract it somewhere
dlclist.xml, extratitleupdatedata.meta

3. Open dlclist.xml and extratitleupdatedata.meta using notepad
   add this line into dlclist.xml : <Item>dlcpacks:\r6\</Item>
   add this line into extratitleupdatedata.meta :
   <Item type="SExtraTitleUpdateMount">
                   <deviceName>dlc_r6:/</deviceName>
                   <path>update:/dlc_patch/r6/</path>
           </Item>

4. Drag or replace the data you have modified before using OpenIV

Use Simple trainer and spawn the vehicle by model name "r6"
